RE GIA CERAMICA

NATURAL CLAY TILE

Design Origin

La terracotta, un materiale ceramico ottenuto dalla cottura dell'argilla naturale, prende il nome dall'italiano: earth significa terra, fired significa cotta, quindi significa "terra cotta", uno dei linguaggi architettonici più antichi dell'umanità. Questo umile materiale, presente da migliaia di anni, custodisce il calore e i ricordi della civiltà umana, dalle ceramiche neolitiche all'Esercito di Terracotta, dalle sculture dell'antica Grecia alle statuette di argilla indiane. Il suo fascino è puro: forgiata in argilla naturale fine, acquisisce la sua caratteristica tonalità rosso-marrone dall'ossido di ferro, e la sua natura porosa la connette con la natura stessa. Le tonalità arancio-rosse e marroni, consumate dal tempo, non sono solo colori, ma segni del tempo. Ora reinterpretiamo questo antico materiale con la tecnologia moderna, infondendo nuova vita all'arte ceramica secolare negli spazi contemporanei

INNOVAZIONE TECNICA

MATERIALE

Abbiamo ottimizzato la formula e migliorato la qualità dei materiali adottando minerali e argilla di qualità superiore, elevando la qualità del prodotto fin dall'origine. Allo stesso tempo, abbiamo aumentato la temperatura di cottura per garantire che indicatori come durezza, resistenza e tasso di assorbimento d'acqua superino quelli delle normali tegole in terracotta.

COTTURA

La temperatura di cottura viene innalzata dai tradizionali 900-1000 °C a 1150-1200 °C, limitando il tasso di assorbimento d'acqua dei prodotti finiti a circa il 6%. Le piastrelle in ceramica convenzionali hanno un tasso di assorbimento d'acqua superiore al 10%, la maggior parte supera il 15%. Uno speciale trattamento superficiale crea un sottile effetto di trasformazione in forno sulla superficie.

LAVORAZIONE SECONDARIA

Sfruttando le solide capacità di post-elaborazione dell'azienda, siamo in grado di offrire lavorazioni flessibili e personalizzate, comprese le modifiche a dimensioni, forma e texture superficiale. Ciò migliora in modo completo l'adattabilità del prodotto a diversi spazi applicativi e standard decorativi.

PROPRIETA' FISICHE

Proprietà meccaniche ottimizzate in modo completo: minore assorbimento d'acqua, maggiore resistenza e migliore resistenza all'usura. Elimina alla radice graffi superficiali e polvere, difetti comuni delle tradizionali piastrelle in terracotta dovuti alla loro scarsa resistenza. Resistente agli acidi, agli alcali e alla corrosione, è adatto sia per interni che per esterni, coprendo diverse situazioni.

AMBITI DI APPLICAZIONE

Il nostro prodotto offre un'ampia gamma di applicazioni. È ideale per verande, balconi, ingressi, soggiorni, cucine e bagni. Grazie alla sua notevole versatilità, è perfetto per rivestimenti di pareti e pavimenti interni ed esterni, piscine, mobili su misura e pareti divisorie, garantendo la massima fruibilità in ogni situazione.

Colori a tutta massa: Oltre al tradizionale marrone rossastro, vengono create cinque tonalità principali: bianco, cotto, rosso, caffè e nero. Non smaltate e colorate in massa, ogni piastrella mantiene l'uniformità dall'interno verso l'esterno, resistendo agli urti quotidiani e conservando il suo colore nel tempo. Doppia texture: Il lato naturale opaco conserva la traspirabilità intrinseca della terracotta, rivelando il delicato fascino delle lievi variazioni di colore dovute alla cottura. Il lato satinato, rifinito con un trattamento post-cottura, offre un tocco setoso, caldo e liscio.

PRESTAZIONI TECNICHE

Elemento di prova	Metodo di prova	Risultato del test
Assorbimento d'acqua	GB/T 3810.3-2016	5.2,5.1,5.1,5.3,5.2 5.2
Durezza superficiale al graffio secondo Mohs	EN 15771:2010	6
Coefficiente di attrito dinamico	ANSI A326.3-2021	0.64 Coefficiente di attrito dinamico medio in condizioni di bagnato: 0,64
Resistenza allo scivolamento	DIN EN 16165: 2023 Annex B	Valore del test di rampa, Ashod: 28* Classe di resistenza allo scivolamento: R12

Elemento di prova	Metodo di prova	Requisiti	Risultato del test
Dimensioni e qualità della superficie: Naturale			
Lunghezza e larghezza	GB/T 3810.2-2016	±2.0%	+0.05%~+0.07%
Deviazione ammissibile della dimensione media di ciascuna piastrella (4 lati) rispetto alla dimensione di lavoro		±4mm	+0.2mm~+0.3mm
Deviazione ammissibile della dimensione media di ciascuna piastrella rispetto alla dimensione media di 10 campioni di prova	GB/T 3810.2-2016	±1.5%	-0.01%~+0.01%
Deviazione ammissibile dello spessore medio di ciascuna piastrella rispetto alla dimensione di lavoro	GB/T 3810.2-2016	±10%	-0.6%~+0.8%
Deviazione massima dalla rettilineità rispetto alle corrispondenti dimensioni di lavoro	GB/T 3810.2-2016	±0.6%	-0.02%~-0.01%
Deviazione massima dalla rettangolarità rispetto alle corrispondenti dimensioni di lavoro	GB/T 3810.2-2016	±1.0%	-0.08%~+0.08%
Planarità della superficie: la massima deviazione dalla planarità			
a) curvatura centrale, correlata alla diagonale calcolata a partire dalle dimensioni del pezzo	GB/T 3810.2-2016	±1.5%	+0.05%~+0.07%
b) curvatura del bordo, correlata alle corrispondenti dimensioni del lavoro	GB/T 3810.2-2016	±1.5%	-0.05%~+0.08%
c) deformazione, correlata alla diagonale calcolata dalla dimensione del lavoro	GB/T 3810.2-2016	±1.5%	-0.07%~-0.02%
proprietà chimiche			
resistenza alle macchie			
a) Colorante verde in olio leggero	GB/T 3810.14-2016	metodo di prova disponibile	1 Class 1
b) agente colorante rosso in olio leggero	GB/T 3810.14-2016	metodo di prova disponibile	1 Class 1
c) Iodio, soluzione a 13 g/L in alcol	GB/T 3810.14-2016	metodo di prova disponibile	5 Class 5
d) olio d'olive	GB/T 3810.14-2016	metodo di prova disponibile	1 Class 1

Elemento di prova	Metodo di prova	Requisiti	Risultato del test
proprietà fisiche			
resistenza alla rottura, in N	GB/T 3810.4-2016	±1.5%	-0.01%~+0.01%
modulo di rottura, in N/mm	GB/T 3810.4-2016	minimo 20	20.1
non applicabile alle piastrelle con resistenza alla rottura ≥ 3000N		individuo minimo 18	19.8~20.3
resistenza all'impatto: coefficiente di restituzione (COR)	GB/T 3810.5-2016	metodo di prova disponibile	0.78
resistenza all'abrasione profonda delle piastrelle non smaltate: volume rimosso, in millimetri cubi	GB/T 3810.6-2016	≤393	238~250
coefficiente di dilatazione termica lineare: dalla temperatura ambiente a 100 °C	GB/T 3810.8-2016	metodo di prova disponibile	$5.1x10^{-6}℃^{-1}$
resistenza agli shock termici	GB/T 3810.9-2016	metodo di prova disponibile	resistenza completa
espansione dell'umidità, in mm/m	GB/T 3810.10-2016	metodo di prova disponibile	<0.06
resistenza al gelo	GB/T 3810.12-2016	metodo di prova disponibile	resistenza completa
resistenza agli agenti chimici			
resistenza ai prodotti chimici domestici e ai sali per piscine			
a) Prodotti chimici per uso domestico: cloruro di ammonio, 100 g/L	GB/T 3810.13-2016	Minimo UB	UA
b) Sali per piscine: soluzione di ipoclorito di sodio, 20 mg/L	GB/T 3810.13-2016	Minimo UB	UA
resistenza a basse concentrazioni di acidi e alcali			
a) soluzione di acido cloridrico al 3% (v/v)	GB/T 3810.13-2016	classificazione da produttore a stato	ULA
b) soluzione di acido citrico, 100 g/L	GB/T 3810.13-2016	classificazione da produttore a stato	ULA
c) idrossido di potassio, 30 g/L	GB/T 3810.13-2016	classificazione da produttore a stato	ULA
resistenza a basse concentrazioni di acidi e alcali			
a) soluzione di acido cloridrico al 18% (v/v)	GB/T 3810.13-2016	metodo di prova disponibile	UHA
b) acido lattico, 5% (v/v)	GB/T 3810.13-2016	metodo di prova disponibile	UHA
c) idrossido di potassio, 100 g/L	GB/T 3810.13-2016	metodo di prova disponibile	UHA
rilascio di piombo e cadmio			
rilascio del piombo	GB/T 3810.15-2016	metodo di prova disponibile	<0.02mg/dm²
rilascio di cadmio	GB/T 3810.15-2016	metodo di prova disponibile	<0.003mg/dm²
